Feathers

**A Kinky Gay
Dinosaur Coloring
Book**

by tmn of © jessi lee pines

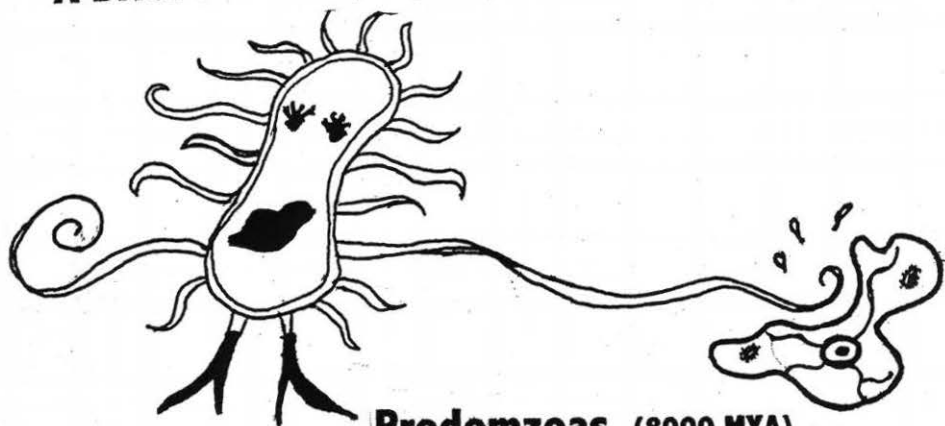

Gay dinosaurs first appeared in the Queerassic Period.

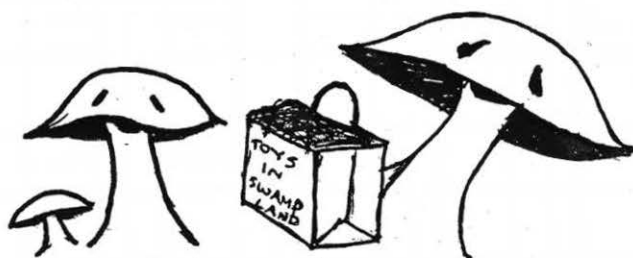

The first known cases of unambiguously feathered dinosaurs were *Protarchaeopteryx* and *Caudipteryx*. Pictured here is *Caudipteryx*.

Sukuoffagus

How to tell if you are a gay dinosaur:

- **Do you have feathers?**
- **Do you fantasize about gay dinosaurs?**
- **Are you a dinosaur?**
- **Are you gay?**

If you answered “yes” to most of these questions, then you are probably a gay dinosaur.
